

QuickSpark

NATURAL ENERGY

AT A CELLULAR LEVEL

Nicotinamide adenine dinucleotide (NADH), also known as CoEnzyme 1, has crucial roles in many cellular processes. One of them is acting as a primary enzyme in the production of cellular energy. During this process, Adenosine triphosphate (ATP), a naturally occurring molecule in the body essential for the creation of energy at a cellular level is produced. ATP is used for nearly every task in the human body.

DIRECTIONS FOR USE: Take two lozenges per day as needed. Place under tongue until fully dissolved. For maximum effectiveness, do not chew lozenges.

This product should be used as a part of a balanced and varied diet inline with a healthy lifestyle. Do not exceed the recommended intake. Keep away from young children.

Store in a cool, dry place.

INGREDIENTS: Bulking agent (D-mannitol), stabilisers (microcrystalline cellulose, polyvinylpolipirrolidone), NADH (reduced Nicotinamide Adenide Dinucleotide, 8,55 %), acidity regulator (sodium bicarbonate), natural mint flavour, anti-caking agent (magnesium salts of fatty acids).

No caffeine, sugar, dairy and preservatives.

No artificial colours or flavours.

This product sample is not to be promoted or sold. It is for your personal use only. Please note that QuickSpark is currently only sold in Austria and accompanying information you have received today is only applicable to this market.
